AURORA, A 150-meter-long Immersive Digital Entertainment Street Emerging As the Hottest Media Art Attraction

Aurora presents "Cosmic Odyssey" digital show

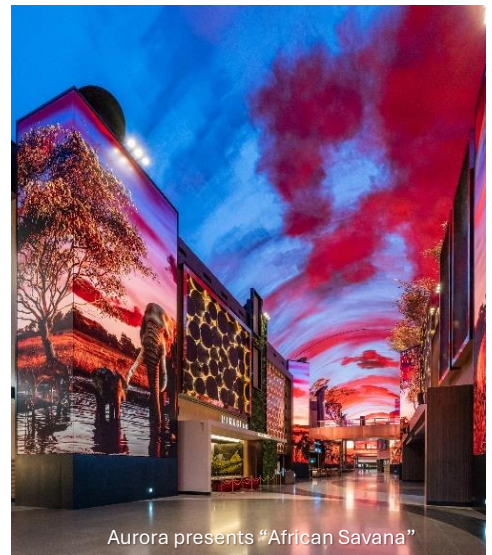

Aurora presents "Under the BlueLand" digital show

Aurora, one of the most popular attractions in INSPIRE, is a state-of-the-art immersive digital entertainment street that brings surreal imagery to life on ultra-high-definition LED screens, which covers the ceiling and giant columns rising to the ceiling. Totalling 150 meters in length and 25 meters in height, it stretches in a straight line from the south entrance on the second floor to the Rotunda area. Strolling through this amazingly creative environment, guests are treated to spectacular digital art shows unlike anything they've ever seen. They also feel as if meandering through tall grasses in a mystical forest, basking in the warm golden glow of a savanna at sunset, or they find themselves submerged in the depths of a majestic cerulean sea or journeying through unknown galaxies.

Currently, Aurora showcases two themes alternately every 30 minutes: *Under the BlueLand*, which features large humpback whales swimming through a dynamic underwater landscape, and *Cosmic Odyssey*, which shows the vastness and beauty of the universe along with mysterious creatures and surreal alien landscapes. After the show time instilling a sense of wonder and excitement in visitors, the beautiful media art videos themed *Astral Forest* and *African Savanna* mesmerize people again as if they go on a journey to another worlds. The *African Savanna* theme creates a magical summer night ambiance in the space, depicting the beauty of the savanna at twilight with the sun blazing red. Rich colors of deep sunsets, vibrant wildlife movements, and vast vistas of the great outdoors, evoke the feeling of walking on the real savanna.

Meanwhile, the Aurora entrance, or **Cube**, showcases the *Crystal Palace* theme to transform into a transparent and luminous space that resembles an ancient palace. The large LED screen in front of the entrance, the delicate arches and various objects on the left and right walls, and the vast dome on the ceiling create a three-dimensional area visible from multiple viewpoints, making for a photogenic space.

Rotunda, connecting different areas of the resort including the INSPIRE Arena, showcases the essence of kinetic art. The magnificent digital chandelier in Rotunda comes to life in a variety of patterns and shapes, creating an immersive visual experience for visitors along with the Aurora.
