*Industry Awards: Best Supplier Innovation*

The Card Recycler, Light & Wonder

THE CARD RECYCLER™ is the dream of every property that deals heavily in baccarat or other high-volume, single-use card play. Baccarat, despite being an exhilarating game, has the potential to produce a lot of card waste by disposing whole decks of gently used cards. THE CARD

RECYCLER ensures operators are given the opportunity to navigate the way towards a greener future where excess card waste becomes a thing of the past.

### **Saving money one card at a time**

- All used cards from a table game are collected and loaded into the THE CARD RECYCLER for evaluation using proprietary technology to identify their degree of wear and tear
- Any gently used cards that can be recycled back into play are sorted into complete decks, while heavily damaged cards are collected in a separate vault for proper accounting and disposal
- Sustainability is at the forefront of this design, with reuse as opposed to excess waste being a benefit to everyone, the property included
- Savings on materials by buying fewer decks of cards to accommodate heavy single-use card play
- Reduced labor costs for properties with a manual solution rather than automatic for salvaging cards
- First-in-the-industry solution lets customers lead the way to a new future
- Securely stores all cards entered in it until it distributes a complete deck, ensuring no tampering possible
- Efficiently reintroduces complete decks to the floor when they're prepared by THE CARD RECYCLER
