

Interblock's **Dual Baccarat**, enhanced by the groundbreaking Smart Pit technology, represents a transformative advancement in the electronic table gaming (ETG) landscape, setting a new benchmark for efficiency, player engagement, and operational excellence. This product uniquely combines the traditional appeal of live baccarat with the precision and scalability of modern electronic gaming, creating a seamless experience that meets the evolving demands of today's gaming industry.

What makes Dual Baccarat truly exceptional is its ability to significantly elevate decision-making speed—achieving up to 120 decisions per hour—while simultaneously maximizing player capacity far beyond the constraints of conventional tables. This is accomplished through an intuitive Dealer Console that simplifies operations, reduces overhead, and optimizes the player-to-dealer ratio. The integration of Smart Pit technology ensures that every game is conducted with the highest level of security and accuracy, offering a safe and error-free environment for both players and operators.

Moreover, Dual Baccarat caters to a wide spectrum of player preferences with its versatile gameplay options. Whether players prefer traditional or no-commission baccarat or are enticed by a variety of engaging side bets, this product delivers an immersive experience that keeps them coming back. The sleek design and intelligent functionality of Dual Baccarat not only broaden the player base but also enhance the overall profitability of the gaming floor.

Interblock's Dual Baccarat is more than just a game; it's a pioneering platform that redefines the possibilities of electronic table gaming. By merging classic gameplay with cutting-edge technology, Interblock has created a product that stands out as a leader in the industry, making it a strong contender for this award.

SMART PIT

TECHNOLOGY

DUAL BACCARAT

Interblock presents a groundbreaking synergy between Dual Baccarat and Smart Pit technology, re-shaping Live Pits and empowering operators to amplify revenue and profitability. The solution optimizes table layouts and expands player bases, guaranteeing heightened performance and revenue.

HIGHLIGHTS

Enhanced Efficiency: Experience an innovative Dual Baccarat setup where a single dealer seamlessly handles two shoes in sequence. This boosts hands dealt and handle, significantly increasing profits compared to traditional live Baccarat tables.

Increased Decisions per Hour: Operators enjoy a remarkable decision-per-hour boost, offering up to 120 decisions—far surpassing the 50-60 decisions on traditional live Baccarat tables.

Unlimited Player Capacity: Gone are the constraints of accommodating only six players. Interblock's Dual Baccarat allows one dealer to cater to an unlimited player count, optimizing player-to-dealer ratios and cutting labor costs.

Streamlined Operations: The user-friendly Dealer Console requires minimal dealer skill, broadening the hiring pool and simplifying operations. Secure electronic transactions seamlessly integrate game protection, eliminating payout errors.

Versatile Gameplay: Interblock's Dual Baccarat ensures an exhilarating gameplay experience without compromise. Choose between traditional 5% Commission or No-commission Baccarat, and explore a range of engaging side bets, including Lucky Nines, Any Pair, Hi-Ti, and Super 6, delivering unending excitement for players.
