

ENTERTAINMENT EVOLUTION

IGT's Jie Cai Shen Link is the latest evolution of the popular Ying Cai Shen game series. It retains the recognizable characters and symbols that players have enjoyed in the original Ying Cai Shen game; with the difference being the addition of an enhanced progressive jackpot feature with random credit prizes and multipliers.

Each Jie Cai Shen game title offers different features:

- “Jin Yu Man Tang” features a random trigger, which awards the number of free games, WILDs and gameplay windows
- “Rong Hua Fu Gui” features ‘Choose-Your-Own-Volatility’ options for players during free gameplay

During base gameplay, collecting two Pearl symbols on the same reel during the base game will lock that entire reel for the next two paid games. This ‘Wild-Stays-2-Plays’ mechanic can provide the opportunity for players to build-up winning combinations and improve the chance to trigger the progressive jackpot feature.

The Pearl symbols can also directly trigger the progressive jackpot feature. When the progressive feature is activated, it includes:

- Multipliers that correspond with the player’s bet multipliers. Higher bets lead to higher potential multipliers
- Random credit prizes awarded during the feature

This entertaining Link is an 88-credit cost-to-cover Multiway game available on IGT’s CrystalCurve®, PeakCurve49™ and PeakSlant49™ cabinets, which offer ultra-high-definition screens for an immersive player experience.

To experience these innovative features in action, please refer to the [gameplay feature video](#) provided via this [LINK](#).

Jie Cai Shen is now playing in venues across all Asian regions with two game titles – Jin Yu Man Tang, Rong Hua Fu Gui. A third title – Gong Xi Fa Cai – will be available soon.
