

CRAPS

Interblock's Live Craps sets a new gold standard for table gaming, ingeniously merging the classic thrills of craps with groundbreaking advancements. At its core is the revolutionary Mirror Technology, which empowers players to take on the exhilarating role of the shooter, an industry-first that significantly amplifies player engagement and interaction.

The true genius of Live Craps lies in its impeccable blend of authenticity and innovation. Real dice, traditional table felt, and enhanced visibility recreate the electrifying atmosphere of live craps, while advanced features like "Live Dice

Recognition" ensure unparalleled accuracy and game integrity. This military-grade technology instantly captures the outcome of each roll and thwarts any post-roll alterations, solidifying player trust and game credibility.

Not just a player-centric innovation, Live Craps is a boon for operators. With the capability to accommodate an unlimited number of players and deliver 120 rolls per hour, the game is a powerhouse of efficiency and profitability. The intuitive Dealer Console requires minimal skill, broadening the hiring pool and optimizing labor costs.

By redefining player experience, fortifying security, and driving operational efficiency, Interblock's Live Craps stands out as an extraordinary accomplishment in gaming innovation and is a deserving contender of this award.

SMART PIT

TECHNOLOGY

CRAPS LIVE
TABLE

Interblock's Live Craps, enhanced with Smart Pit technology, boosts casino efficiency and profitability. It combines traditional Live Craps with variants like Easy and Crapless Craps, enriching player choices, refining layouts, and upscaling revenue. Live dice recognition boost game transparency, solidifying Live Craps as a top-tier experience for both operators and players.

MIRROR TECHNOLOGY

Interblock's Mirror Technology lets players in Live Craps become the shooter. Players can throw dice and wager at the Craps table using the Mirror Console, momentarily locking the Player Terminal screen to deepen player involvement.

SECURE GAMING

Interblock's "Live Dice Recognition" accurately captures each roll's outcome, ensuring a tamper-free gaming experience. The "Past Posting Prevention" detects and stops any post-roll alterations, maintaining game integrity.

HIGHLIGHTS

Efficient Dealer Utilization: Enables operation of multiple game types, negating the need for specialized labor and allowing ratio adjustments based on demand.

Labor Savings & Yielding: Optimizes labor during slow periods and facilitates efficient shifting between Live Craps and retail play.

Advanced Security: Incorporates "Live Dice Recognition" and "Past Posting Prevention" for game integrity.

Player Participation: Patent-pending Mirror Technology lets players directly wager at the Live Table, with cameras immersing them in every roll.

Authentic Gaming: Uses the traditional felt surface for a genuine Craps experience.

Simplified Gameplay: Automated processes streamline betting and gameplay, enhancing the user experience.

Engaging Visuals: Offers optimized visibility for an immersive gaming atmosphere.
